ABOUT ME

AI and software engineer with experience in agentic systems, full-stack development and open-source technologies. Skilled in designing governed AI workflows, multi-agent architectures and production web platforms using Next.js, React, Node.js, TypeScript and modern cloud infrastructure. Focused on turning complex requirements into autonomous, reliable and scalable digital systems.

WORK EXPERIENCE

AI Agentic Engineer

TYTOS GmbH

April 2026 - Present

Designed and engineered AI-driven platforms and multi-agent workflows that transform business requirements into implementation plans, code changes, automation blueprints, and reviewed pull requests. Built governed agentic systems with human approval gates, sandboxed execution, deterministic testing, retries, audit trails, and secure multi-tenant controls. Integrated OpenAI, GitHub Actions, Temporal, Supabase/PostgreSQL, Next.js, TypeScript, GitHub, and Slack for workflow orchestration, CI/CD, observability, and controlled publishing. Also developed governed generative-AI pipelines for image production and LoRA training with human review, provenance tracking, and reproducible evaluation.

Technical Consultant

Info Gain Consulting

February 2024 - April 2026

Developed a multi-tenant consignment management system with role-based access using NextJS, NestJS, MongoDB, and Docker. Built real-time notifications and automated invoicing for subscription clients. Led the IGC Portal project, integrating Bid, contract, and Service Request modules. Designed and developed an Electronic Case Management System for the Ministry of Labour with workflow automation. Set up GitLab CI/CD pipelines, enforced security measures, and built a custom WordPress solution for Remote Labor Force. Also developed APIs for system integrations and optimized application performance.

Front-End Developer

Angaza Elimu

January 2024 - March 2024

Contributed to the front-end development of their E-Learning Portal, enhancing user engagement and performance. I implemented responsive UI components using React.js and collaborated with the backend team to integrate real-time data features. My work improved platform usability for students and educators across multiple devices.

Software Developer

Elixar Technologies

January 2023 - August 2023

Built responsive React interfaces for the Mechwangu website and integrated RESTful APIs. Helped develop a Church Management System with user-friendly features. Improved performance and cross-browser compatibility, used Git for collaboration, and applied open-source UI libraries for consistent design.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology

Bachelor Of Science In Computer Science

2019 - 2023

Modcom Institute of Technology

Certificate in Web and Mobile Application Development

January 2019 - April 2019

The Alliance High School

High School Diploma - Grade A-

2015 - 2018
