JAMES GATORU

Software Developer / AI Agentic Engineer

gatorumbugua@gmail.com
github.com/James-Toru | linkedin.com/in/james-mbugua-78a63917b

I build web applications and AI workflows, bringing together responsive interfaces, backend systems and human oversight.

EXPERIENCE

AI Agentic Engineer | TYTOS GmbH

April 2026 - present

Designed AI platforms and supervised multi-agent workflows with human approval, sandboxed execution, testing and audit trails. Integrated OpenAI, GitHub Actions, Temporal, Supabase/PostgreSQL, Next.js and TypeScript. Developed governed generative-image and LoRA-training pipelines.

Technical Consultant | Info Gain Consulting

February 2024 - April 2026

Developed multi-tenant consignment management with role-based access, notifications and invoicing. Led the IGC Portal, integrating bid, contract and service-request modules. Built case-management workflows, APIs and a custom WordPress solution.

Front-end Developer | Angaza Elimu

January 2024 - March 2024

Contributed responsive React interfaces to e-learning platforms and collaborated on RESTful API integration.

Software Developer | Elixar Technologies

January 2023 - August 2023

Built responsive React interfaces, integrated RESTful APIs and contributed to church-management application development.

Software Developer | Freelance

June 2020 - January 2023

Developed web applications, including Lugawa, Texplore and Aslice.

SKILLS

React, Next.js, TypeScript, Node.js, NestJS, Express, PostgreSQL, MongoDB, WordPress, Docker and CI/CD. Agentic AI, LLM integration, workflow orchestration, LoRA pipelines and human review. Figma, Illustrator and Photoshop.

EDUCATION & CERTIFICATION

BSc Computer Science | Jomo Kenyatta University of Agriculture and Technology
2019 - 2023

Certificate in Web and Mobile Application Development | Modcom Institute of Technology
January 2019 - April 2019

PL400 | Microsoft Power Platform Developer Associate
